Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-16, drawn to a fitted sheet, classified in class 5, subclass 497.
- II. Claims 17-20, drawn to a method of making a sheet, classified in class 5, subclass 1.

The inventions are distinct, each from the other because:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case such as omitting the removing the square corner of a rectangular sheet, and instead, stitching lateral strips to a sheet.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

A telephone call was made to Mr. Taylor's office on 9/28/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Note the close prior art cited on attached PTO 892.
